

# Consistently deliver your message

## Mailstream Evolution™ Inserting System

### Built for productivity

In today's economy everyone is expected to do more with less. Production mailers must consider every possible tactic which could help reduce costs, while meeting the SLAs their internal and external customers demand, every time.

With the Pitney Bowes Mailstream Evolution™ Inserting System you can rely on consistency, predictability, integrity and flexible configuration options for higher overall productivity. The Mailstream Evolution Inserter is the next generation of the world's best selling FPS™ Split Drive Inserter with over 1,500 installations in the past five years.

### Built in productivity

Whether you have high or low page counts, cutsheet or continuous applications, we can help you design a system that meets your exact business needs with the highest possible productivity.

### Faster changeover

Achieve the fastest job changeover in the industry with automated job setup, linescan cameras which read all symbologies anywhere on the input document, and material handling options that can rotate, flip or turn your collation.

### Process letters and flats

Process letters and flats on a single system that does it all! The base system runs #10 and 6x9 letters. Additionally it can be enabled to run flat mail with a field upgrade.

### Dependable results, every shift

Engineered for consistent high performance operation, the Mailstream Evolution Inserting System's motion control system controls, detects, corrects, slows down and/or accelerates variable thickness materials to achieve the best possible throughput. This superior paper handling helps increase uptime and substantially extends the intervals between regularly scheduled preventative maintenance.

## Recommended Base Configuration (Built for Productivity)

Component	Pitney Bowes Solution	
Inserters Chassis	Mailstream Evolution™ 12-14K Inserting System	Process letters at speeds up to 14K per hour
Inserters Control Technology	Direct Connect Screen	Control and monitor mailpiece assembly with high integrity
User Interface	Top Down Graphical User Interface	Help operators quickly identify and remedy stoppages
Input Choices	Choice of integrated Advanced Productivity Inputs (API) or High Productivity Inputs (HPI)	Support cutsheet or continuous applications while processing up to 7 page tri-fold or 10 page half fold collations (20-lb paper)
Insert Feeders	Friction insert feeders with gap separation and roller-based feeding	Insert CDs, Z-folded, stiff booklets, open ended leading inserters, credit cards and more
Stacker	On Edge Envelope Stacker	Increase operator efficiency with up-right letter mail stacking
Automated Job Setup	DFWorks® Mailrun Management	Simplify inserter setup for operators
Reporting	P/I™ Direct Access Productivity Reporting with Idle Time Tracking	Manage resources, reduce inserter downtime and report on productivity metrics
Flexible Service Options	ServiceWorks™ Solutions	Choose from a variety of flexible service options, including on-site service, on-call service and packages such as blocks of service hours or technical training

### Mailstream Evolution™ 12-14K Inserting System

## Additional Options to Meet Specific Requirements

Challenge	Pitney Bowes Solution	
High Page Count Letter Applications	High Productivity Input with Heavy Duty Folder	Process up to 9 page tri-fold or 16 page half fold collations (20-lb paper)
Face Up/Face Down Applications	Twist-No-Twist Module	Flip collations prior to entering inserter chassis
Flat and Letter Applications	Flats Processing Capabilities	Process up to 80 flat page collations (20-lb paper)
	No Changeover Module	Rotate collation from portrait to landscape for fast changeover
Specialized Inserts	Rotary Insert Feeders	Insert single panel glossy, stitched or glued booklets, multiple coupons, chromate sheet, onion skin paper and more
Stringent SLAs	DFWorks® Production Workflow	Real-time job tracking and SLA monitoring
	DFWorks® Productivity Reports	Advanced productivity reporting, including multi-site reports and advanced analytics
Meters	DFWorks® Postage Accounting	Automated postage funds management and usage reporting
Closed-faced Envelopes	Envelope Finishing	Print addresses or marketing messages on envelopes
Individual Mailpiece Verification	Direct Connect Verify	Identify and track the mailpiece, verify via file-based processing
