# W360 Multifunction Tabber System

## You are the source

Self-mailers are a great way to get messages out to customers. They are highly effective for selling products and services, generating leads and promoting business. They are also a cost-effective way to communicate. Employees look to mailing operations for expertise in processing, assembly and posting. They rely on you to know the best way to get the job done, for having the right technology, understanding and implementing USPS processing regulations, and for leveraging postal discounts.

## Rely on the best

The W360 Tabber has some of the most advanced tabber technology to help you prepare self-mailers for delivery. You'll have the capability to meet the latest USPS tabbing regulations, and get the job done fast and efficiently. This tabletop, dual-head Tabber provides several tabbing applications and stamp affixing in one system. It is a heavy-duty system, designed for high-performance operations with reliability you can count on.

## Lots of applications

This tabletop system tabs a variety of documents and promotional material. Using this mail format can help you increase sales leads and traffic, quickly communicate offers, news and information, enhance brand awareness and recognition, or build customer loyalty and increase retention. Whatever format you choose to accomplish this, the W360 Tabber gives you lots of flexibility, making your operation's capabilities even richer.

Folded Self-Mailer  
1 Tab

Simple Spine Booklet  
3 Tabs

Wallet-Style Booklet  
2 Tabs

## Automated mailing discounts

The USPS requires that self-mailers (mail not placed in an envelope) arrive at the Post Office properly sealed/tabbed. Because proper sealing and tabbing allows for smooth processing in USPS's sorting equipment, mailers who take advantage of it qualify for automation discounts.

- Simultaneously applies up to 1 1/2" tabs to top and sides or opposite sides of mail piece in single pass
- No need to run jobs through twice, saving time by completing most tasks in a single pass

## Fast and neat

When processing big jobs, you want a system that can keep up with your demanding schedule. Deadlines are not an issue with the W360 Tabber. It operates at speeds that keep your operation moving along, smoothly and efficiently.

- Applies up to 25,000 tabs per hour-fast
- Optional Conveyor Stacker organizes and collects the output, keeping your operation running smoothly
- Stacker communicates directly with Tabber, sensing when to pause when stacker is full

## Flexibility

This multifunction Tabber will let you do things you never thought possible. It has loads of capabilities:

- Applies up to 1 1/2" tabs to booklets on the open edge, while at the same time placing side-to-side tabs, meeting USPS requirements
- Applies single, double or triple tabs that can be positioned where you want them, depending on your application
- Applies up to 3 USPS® stamps in a single pass for added flexibility
- Can apply both lead edge and surface tabbing to accommodate how the piece is designed
- Utilizes clear, translucent or paper tabs for design flexibility
- Handles material up to 1/4" thick for flexible material handling

### Large Backlit LCD Control Panel

- Operates the entire system-Tabber & stacker
- Easy to use and read, self-prompting display
- Stores up to 4 predefined jobs

### Locking Casters

For easy movement of the stacker

## Key features

- Side-to-side, or top-to-side tabbing in one single pass
- Applies up to three 1 1/2" tabs in a single pass
- High-quality tabs available through pb.com supplies
- Will apply up to 25,000 tabs per hour. The W985 Conveyor Stacker communicates directly with the Tabber and includes an optical sensor that pauses the Tabber when the stacker becomes full.
- Will also apply up to 3 USPS® stamps to a single document.
- Easy-to-use digital LCD control panel. Program and save up to four jobs.

## Pitney Bowes total solution
